Dependency Ratio - 2010

Dependency ratios estimate the proportion of working age population to the non-working age population.

In 2010, Nova Scotia's dependency ratio was slightly higher than Canada's at 44.7%. Canada's dependency ratio was 44.1%.

Over time, the composition of Nova Scotia's 'dependent' population is changing. In 2008, the percentage of Nova Scotia's population aged 65 years and older surpassed the percentage of the population aged 14 years and younger.

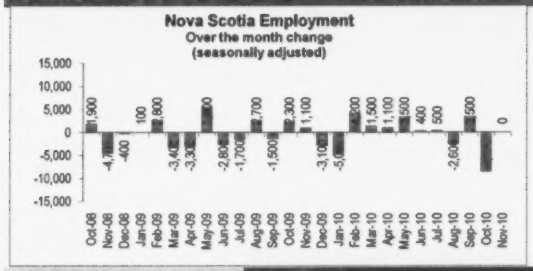
NOVA SCOTIA AND CANADA ECONOMIC INDICATORS | November

WORKFORCE & INCOME: Employment Growth on Hold



Labour Force Survey, November 2010

It appears that the recent stop/start employment cycle in Nova Scotia is on hold. After six consecutive months of positive growth starting February 2010 , there was a decline in August, an increase in September, a drop in October and now no change in the employment level for November over October 2010. This recent trend may suggest a volatile period in employment growth for Nova Scotia. This may reflect employers trying to anticipate the timing of a full recovery. In the early part of 2010, positive economic data suggested that the global recovery was well underway. However, recent economic data and events have raised global uncertainties, especially about the slow pace of US recovery.

Compared with November 2009, seasonally adjusted employment is down by 4,600 or 1.0 percent. There was however an increase of 0.2 per cent in average employment for the first eleven months of 2010 over the first eleven months of 2009.

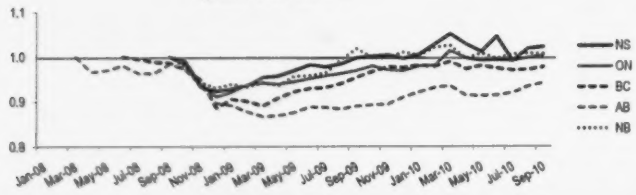
CONSUMPTION & PRICES | Retail Sales Recover Despite HST Increase



Retail Sales - September 2010

Retail sales in Nova Scotia and New Brunswick recovered to pre-recession levels in mid to late 2009. Over the last three months, retail sales in New Brunswick have virtually stalled. Despite the HST increase on July 1, 2010, retail sales in Nova Scotia continue to increase.

In Nova Scotia September 2010, retail sales (seasonally adjusted) increased 0.3% from August 2010 to $1.1 billion and increased 2.4% over September 2009.

In New Brunswick September 2010, retail sales (seasonally adjusted) remained unchanged from August 2010 at $872 million and declined 1.1% over September 2009.

In Canada September 2010 retail sales (seasonally adjusted) increased 0.6% from August 2010 to

NOVA SCOTIA AND CANADA ECONOMIC INDICATORS | November

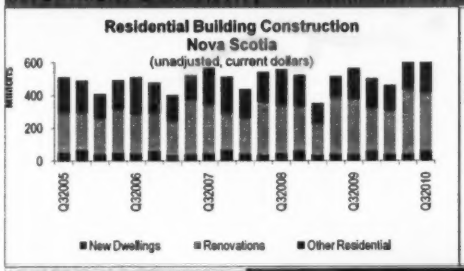
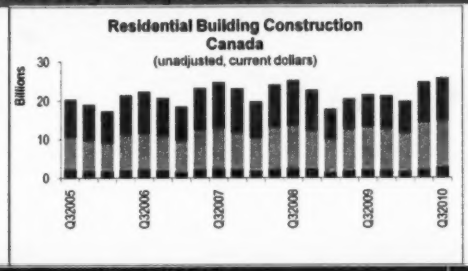
INVESTMENT & GROWTH | Residential Investment Strong Through 3rd Quarter





Residential Construction Investment - 3rd Quarter 2010

In the third quarter of 2010, Nova Scotia's residential construction investment continued its strong recovery. Residential construction investment in the first three quarters was up by 19.9% compared with the same period in 2009. Strong growth was observed in new single dwellings, apartments and renovation investments. This exceeds the pre-recession levels observed in 2008.

Canada's investment in residential building construction increased at a substantial pace, growing by 17.6% in the first three quarters of 2010. However, this growth only just surpasses the pre-recession levels from 2008.
